

Join the Education Committee!

Dedicated to the development and delivery of affordable and convenient educational opportunities for water industry professionals.

As a member you can help support the activities of the Committee in many different ways; there is a role for people of varied backgrounds and experience. We are always looking for new ideas on how we can make training opportunities relevant, interesting and accessible.

We are dedicated to finding ways to improve the quality and accessibility of our educational events through methods such as webcasting and podcasting, sharing ideas with neighboring states to help us expand the range of topics covered, developing “out of the box” training materials and maintaining and enhancing our online information. If you would like more information about the committee’s goals and activities, please visit the ISAWWA Portal at: <http://www.isawwa-portal.com/>

The ISAWWA Education Committee offers affordable educational opportunities in your area and at your desk to help keep you up to date with your contact hours and current technology.

Getting involved

The committee holds regular telephone and some in-person meetings. Outside of the meetings you can assist in the following tasks:

- ◆ Collecting educational topics
- ◆ Developing seminars and finding presenters
- ◆ Developing webinars and finding presenters
- ◆ Developing the Operators Preconference Program at the Annual Conference
- ◆ Reviewing presentations for educational content
- ◆ Monitoring seminars at various locations near you
- ◆ Monitoring webinars from your computer

I want to sign up!

If you are interested in helping us expand and continually improve the education programs put on by ISAWWA, please consider joining the Committee. Whether you are a person with lots of contacts in the water industry, you have a desire to meet new people, you have skills in presentation, you are good at analyzing data or can help us embrace new technology to deliver quality training opportunities, there is a role for you to play. As a committee member you can benefit from networking opportunities, meeting and learning from regional water industry experts and working with a great group of people!
